

Expertise in Improving Process Efficiency, Product Quality, and Minimizing Waste

3200 Series Temperature/Process Controllers

Benefits

The innovative range of 3200 controllers offer precision control of temperature and other process variables together with many advanced features not normally found in this class of controller.

- Precision Auto-tuning Eurotherm PID control
- Optional 8 step profiler/programmer
- Very simple to set up and use with quick codes and configurable menu lists

Key features

- 8 Segment programmer
- Heater failure detection
- Current monitoring
- Customizable Operator messages
- Recipes
- Modbus communications
- Analog and digital retransmission
- Remote setpoint
- Type approved EN14597 TR, EAC, CCC (Exempt)
- Multi-language support (English, French, German, Spanish and Italian)

3200 Series Temperature/Process Controllers Specification

The emphasis of the 3200 Series Temperature/Process Contoller is on ease of use. A simple "Quick Start" code is used to configure all the functions essential for controlling your process. This includes input sensor type, measurement range, control options, and alarms, making "Out the Box" operation truly achievable. In operator mode, every parameter has a scrolling text message describing its function and is available in English, German, French, Spanish or Italian. More advanced features are configured using Eurotherm iTools, a PC-based configuration wizard which is an easy to use and instructive guide to all the functions in the controller.

Heater Current Monitoring

A current transformer input provides display of the heater current and a health check on the load. Heater diagnostics including full and partial open circuit, and short circuit are displayed as scrolling alarm messages as well as providing an alarm output. On the 3208 and 3204 a front panel ammeter displays the heater current.

Setpoint Programmer

Heat treatment profiles can be programmed using the 8-segment programmer. Holdback ("guaranteed soak") can be used at the beginning of each segment. A digital event output can be triggered in any segment to initiate actions within the process.

Custom Text Messaging

Custom messages can be created with Eurotherm iTools and downloaded to the 3200 controller to display when an event, alarm or process condition occurs. This provides the operator with good visibility of the status of the process.

Remote Setpoint

An option exists for the 3200 controller to have a Remote Analog Input. This can be either volts or mA and is used to allow the setpoint to be generated by a master controller or PLC.

Recipes

Using Eurotherm iTools, recipes can be created that may be used to change the operating parameters of the 3200 controller simply by selecting a new recipe using the HMI or digital input. This is very useful where multiple products are processed using the same controller but require different parameters to be set.

Timer

An internal timer is configurable as an interval timer, delay timer, or to provide a soft start for hot runner control.

Setpoint Retransmission

Sending the setpoint or other parameters from the 3200 controller to slave devices can be achieved either by using conventional analog communications or using Master Modbus communications. Master Modbus in the 3200 controller allows a broadcast of a single parameter to the network.

A typical application is a setpoint being retransmitted to a number of slave controllers in a multi-zone furnace.

Modbus Communications

All units support both EIA232 and 2-wire EIA485 communications using the Modbus protocol. The 3216 supports 4-wire EIA485.

Configuration Adaptor

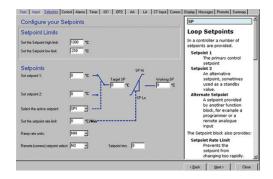

Eurotherm iTools configuration to all 3200 controllers can be achieved by using a USB configuration adaptor. It provides Eurotherm iTools with the ability to communicate with and

configure devices without the need for any power being connected.

Eurotherm iTools Wizard

Used to simplify the set up of 3200 series controllers. The wizard guides the user through the configuration process with interactive help and graphical demonstrations of features.

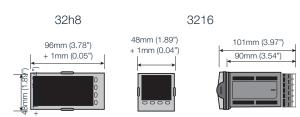

3200 Series Temperature/Process Controllers Specification

General		
Environmental Per	formance	
Temperature limits	Operation:	0 to 55°C
	Storage:	–10 to 70°C
Humidity limits	Operation:	5 to 90% RH non condensing
	Storage:	5 to 90% RH non condensing
Panel sealing		IP65, Nema 12 / NEMA 4X (3216 only)
Shock		BS EN61010
Vibration		2 g peak, 10 to 150 Hz
Altitude		<2000 metres
Atmospheres		Not suitable for use in explosive or corrosive atmosphere*
EEPROM		Rated lifetime 100,000 write operations

Mechanical Details

CE, UL, cUL listed (file E57766) May be field calibrated to control instraccuracy required in AMS2750E EN14597 TR CCC Exempt EAC	rument
Transmitter PSU (not 3216)	
Rating	24 V dc, >28 mA, <33 mA
Isolation	264 V ac, double insulated
Communications	
Serial Communications Option	
Protocol	Modbus RTU slave
	Modbus RTU Master broadcast (1 parameter)
Isolation	264V ac, double insulated
Transmission standard	EIA232 or EIA485 (2-wire) EIA485 (4-wire) on 3216 only
Process Variable Input	
Calibration accuracy	<±0.25% of reading ±1LSD (Note 1)
Sample rate	4 Hz (250 ms)
Isolation	264 V ac double insulation from the PSU and communication
Resolution (µV)	$<$ 0.5 μ V with 1.6 sec filter
Resolution (effective bits)	>17 bits
Linearisation accuracy	< 0.1% of reading
Drift with temperature	<50 ppm (typical) <100 ppm (worst case)
Common mode rejection	48-62 Hz, >-120 dB
Series mode rejection	48-62 Hz, >-93 dB
Input impedance	100 ΜΩ
Cold junction compensation	>30:1 rejection of ambient change
External cold junction	Reference of 0° C
Cold junction accuracy	<±1° C at 25° C ambient
Linear(process) input range	–10 to 80 mV, 0 to 10 V with 100 K Ω /806 Ω external divider module
Thermocouple types	K, J, N, R, S, B, L, T, C, custom download (Note 2)
Resistance thermometer types	3-wire Pt100 DIN 43760
Bulb current	0.2 mA
Lead compensation	No compensation error for 22 $\boldsymbol{\Omega}$ in all leads
Input filter	Off to 59.9 s
Zero offset	User adjustable over full range

2-point gain & offset

Remote Setpoint Input	
Calibration accuracy	<±0.25% or reading ±1LSD
Sample rate	4 Hz (250 ms)
Isolation	264 V ac double insulation from instrument
Resolution	<0.5 mV (for 0-10 V) or <2 μA (for 4-20 mA)
Resolution (effective bits)	>14 bits
Drift with temperature	<50 ppm (typical) <150 ppm (worst case)
Common mode refection	48-62 Hz, >-120 dB
Series mode rejection	48-62 Hz, >-90 dB
Input impedance	Voltage: 223 KΩ and Current: 2R49
Normal input range:	0 to 10 V and 4 to 20 mA
Max input range	-1 V to 11 V and 3.36 mA to 20.96 mA
Software Features	
Control	
Number of loops	1
Loop update	250ms
Control types	PID, ON/OFF, VP
Cooling types	Linear, fan, oil, water
Modes	Auto, manual, standby, forced manual
Overshoot inhibition	High, low
Alarms	
Number	4
Туре	Absolute high & low, deviation high, low or band, rate of change
Latching	Auto or manual latching, non-latching, event only
Output assignment	Up to 4 conditions can be assigned to one O/P
Other Status Outputs	
Functions	Including sensor break, manual mode, timer status, loop break, heater diagnostics, program event
Output assignment	Up to 4 conditions can be assigned to one O/P
Setpoint Programmer	
Program function	1 program x 8 segments with 1 event output (Note 4)
Start mode	Servo from PV or SP
Power fail recovery	Continue at SP or Ramp back from PV
Holdback ("Guaranteed soak")	Inhibits dwell timing until PV within limits
Timer	
Modes	Dwell when setpoint reached Delayed control action Soft start limits power below PV threshold
Current Monitor	
Alarm types	Partial load failure, over current, SSR short circuit, SSR open circuit
Indication type	Numerical or ammeter
Custom Messages	
Number	15 scrolling text messages
No of characters	127 characters per message max
Languages	English, German, French, Spanish, Italian
Selection	Active on any parameter status using conditional command
Recipes	
Number	15 scrolling text messages
Selection	HMI interface, communications or digital I/O

Notes

- Calibration accuracy quoted over full ambient operating range and for all input linearization types.
- 2. Contact Eurotherm for details of availability of custom downloads for alternative sensors.
- 3. Voltage output can be achieved by external adaptor.
- 4. By using recipes five SP programs can be stored.
