

Rosemount™ 396/396VP/396P/396PVP/ 396R/396RVP

TUpH pH/ORP Sensors

TUpH Sensors for Your Tough pH/ORP Applications

Rosemount TUpH pH/ORP sensors are robust sensors designed to meet a number of difficult application requirements. Sensors feature a variety of options suited to meet a number of installation requirements and are ideal for use in dirty, abrasive, coating, and high solid applications.

Overview

Rosemount 396/396VP

Rosemount 396P/396PVP

Rosemount 396R/396RVP

Robust Sensor Design

- TUpH reference technology minimizes sensor maintenance and ensures a steady pH/ORP signal even when sensor is coated.
- Maximize sensor life with poisoning resistant helical reference pathway design.
- Optional flat pH glass electrode for abrasive and coating applications.
- Maximum process pressure 150 psig.
- Maximum process temperature 100 °C.

Versatile Mounting Options to Meet Your Installation Requirements

- Rosemount 396P/396PVP sensors feature 1 in. MNPT front and rear facing process threads.
- Rosemount 396R/396RVP offered in 21 in. and 36 in. lengths suitable for use with retraction assemblies – easily remove sensors for maintenance and calibration without having to shutdown your process.
- Variopol(VP8) cable connection option, for quick cable-to-sensor release, eliminates cable twisting.

Ordering Information

Rosemount 396 and 396VP_{pH} sensors feature a stainless steel body for use with optional 1 inch threaded process connectors suitable for insertion, submersion, or flow through installation. Sensors are available with either a standard pH hemi glass bulb or optional pH flat glass bulb. Rosemount 396 sensors feature a standard 15 ft. integral cable and Rosemount 396VP sensors feature a Variopol cable connection for use with VP8 quick disconnect interconnecting cables (sold separately; see Accessories [Table 9](#)).

4. Only available with option -55.

Rosemount 396P and 396PVP pH/ORP sensors feature a molded reinforced polypropylene body with forward and rear facing 1 in. MPT threads suitable for insertion, submersion, and flow through type installations. The Rosemount 396P sensor has an integral cable connection and the Rosemount 396PVP sensor has a Variopol cable connection for use with VP8 interconnecting cables (sold separately; see Accessories [Table 9](#)).

Dimensional and Installation Drawings

Figure 1. Rosemount 396/396VP with optional connector dimensional drawings

Metal Process Connector PN 23166-xx (xx = 00 for 316 SST and xx = 01 for titanium) can be used for insertion or submersion Model 396 sensor connection to 1-inch tee fittings. It also must be used to connect Model 396R to ball valve PN 23240-00 or directly to the process.

The metal process connector gives the sensor various insertions depths, depending on where the user locates the compression fitting. Also the threads can be switched to face the cable end of the sensor for connection to submersion pipes.
