## **SIEMENS**

Data sheet 6EP1334-2BA20

SITOP PSU100S/1AC/24VDC/10A

SITOP PSU100S 24 V/10 A Stabilized power supply input: 120/230 V AC, output: DC 24 V/10 A \*Ex approval no longer available\*

| type of the power supply network   | 1-phase AC  |
|--|---|
| supply voltage at AC   |   |
| • initial value  | Automatic range selection   |
| supply voltage   |   |
| 1 at AC rated value  | 120 V   |
| 2 at AC rated value  | 230 V   |
| input voltage  |   |
| • 1 at AC  | 85 132 V  |
| • 2 at AC  | 170 264 V   |
| design of input wide range input   | No  |
| overvoltage overload capability  | 2.3 × Vin rated, 1.3 ms   |
| operating condition of the mains buffering   | at Vin = 93/187 V   |
| buffering time for rated value of the output current in the event of power failure minimum | 20 ms   |
| operating condition of the mains buffering   | at Vin = 93/187 V   |
| line frequency   |   |
| 1 rated value  | 50 Hz   |
| 2 rated value  | 60 Hz   |
| line frequency   | 47 63 Hz  |
| input current  |   |
| <ul> <li>at rated input voltage 120 V</li> </ul>   | 4.49 A  |
| at rated input voltage 230 V   | 1.91 A  |
| current limitation of inrush current at 25 °C maximum                                      | 60 A  |
| 12t value maximum  | 5.6 A²-s  |
| fuse protection type   | T 6.3 A/250 V (not accessible)                                    |
| • in the feeder  | Recommended miniature circuit breaker: from 10 A characteristic C |
| utput  |   |
| voltage curve at output  | Controlled, isolated DC voltage                                   |
| output voltage at DC rated value   | 24 V  |
| output voltage   |   |
| at output 1 at DC rated value  | 24 V  |
| relative overall tolerance of the voltage  | 3 %   |
| relative control precision of the output voltage   |   |
| <ul> <li>on slow fluctuation of input voltage</li> </ul>                                   | 0.1 %   |
| <ul> <li>on slow fluctuation of ohm loading</li> </ul>                                     | 1 %   |
| residual ripple  |   |
| • maximum  | 150 mV  |
| • typical  | 20 mV   |

| • maximum   | 240 mV  |
|---|---|
| • maximum   | 240 mV  |
| typical     adjustable output voltage   | 160 mV  |
| adjustable output voltage   | 22.8 28 V   |
| product function output voltage adjustable  | Yes   |
| type of output voltage setting  | via potentiometer   |
| display version for normal operation  | Green LED for 24 V OK   |
| type of signal at output  | Relay contact (NO contact, rating 60 V DC/ 0.3 A) for "24 V OK"   |
| behavior of the output voltage when switching on  | Overshoot of Vout < 3 %   |
| response delay maximum  | 0.3 s   |
| voltage increase time of the output voltage   |   |
| • typical   | 20 ms   |
| output current  |   |
| rated value   | 10 A  |
| • rated range   | 0 12 A; 12 A up to +45°C; +60 +70 °C: Derating 3%/K   |
| supplied active power typical   | 288 W   |
| short-term overload current   |   |
| on short-circuiting during the start-up typical   | 32 A  |
| at short-circuit during operation typical   | 32 A  |
| duration of overloading capability for excess current   |   |
| on short-circuiting during the start-up   | 1 000 ms  |
| at short-circuit during operation   | 1 000 ms  |
| product feature   | . 5556  |
| bridging of equipment   | Yes   |
| number of parallel-switched equipment resources for increasing  | 2   |
| the power   | 2   |
| Efficiency  |   |
| efficiency in percent   | 90 %  |
| power loss [W]  | 56 %  |
| at rated output voltage for rated value of the output   | 25 W  |
| current typical   | 20 VV   |
| Closed-loop control   |   |
|   |   |
| relative control precision of the output voltage with rapid   | 0.3 %   |
| relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical   | 0.3 %   |
|   | 3 %   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of  |   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical  |   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time   | 3 %   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical   | 3 %<br>1 ms   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical   | 3 %<br>1 ms   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time  • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring   | 3 % 1 ms 1 ms   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation   | 1 ms 1 ms protection against overvoltage in case of internal fault Vout < 33 V  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection   | 1 ms 1 ms 1 ms protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes  Constant current characteristic   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time   | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A  Yes  Constant current characteristic  14.6 A  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes  Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit   | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A  Yes  Constant current characteristic  14.6 A  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time   | 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A  Yes  Constant current characteristic  14.6 A  overload capability 150 % lout rated up to 5 s/min  -  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min - Yes   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time  • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time  • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic resource protection class  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min - Yes   |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time  • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current  | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic resource protection class   | 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min  Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I  3.5 mA  |
| fluctuation of the input voltage by +/- 15% typical relative control precision of the output voltage at load step of resistive load 10/90/10 % typical setting time • load step 10 to 90% typical • load step 90 to 10% typical  Protection and monitoring design of the overvoltage protection response value current limitation property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • typical overcurrent overload capability in normal operation display version for overload and short circuit Safety galvanic isolation between input and output galvanic isolation operating resource protection class leakage current   | 1 ms 1 ms 1 ms  protection against overvoltage in case of internal fault Vout < 33 V 12 14.6 A Yes Constant current characteristic  14.6 A overload capability 150 % lout rated up to 5 s/min - Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class I  |
