

3 Product description

Product key
Wiring Unit

3.4 Product key

Due to the modular structure of the 8400 motec inverter, every unit needs an own type key. Although a type key is also defined for the 8400 motec inverter as a set, for practical and logistical reasons it cannot be fixed visibly on the set or on the individual units.

The following lists inform you about the type keys for:

- ▶ **Wiring Unit**
Wiring level to the motor and mains connection
- ▶ **Communication Unit**
Connection level for fieldbus communication and further inputs and outputs, partially optional
- ▶ **Drive Unit**
8400 motec inverter
- ▶ **Accessories**
Efficiency-enhancing and cost-cutting

3.4.1 Wiring Unit

	E84DGV ^①		
	N	x	E
Module part Wiring Unit - 8400 motec			
Version N = not relevant			
Size 1 = 063 / 071 (E84DGDVB3714 ... 1124) 2 = 080 / 090 / 100 (E84DGDVB5514 ... 1524) 3 = 080 / 090 / 100 / 112 (E84DGDVB2224 ... 3024) 4 = 080 / 090 / 100 / 112 (E84DGDVB4024 ... 7524) 5 = 132 (E84DGDVB5524 ... 7524)			
Enclosure E = IP66
