Grid Solutions

Models PTG5-1-110 & PTG5-2-110

Indoor Voltage Transformers Medium Voltage

Accuracy Class

0.3~WXMYZ~1.2~ZZ~at~100%~rated~voltage~with120~V~based~ANSI~burden.

0.3 WXMY, 1.2Z at 58% rated voltage with 69.3 V based ANSI burden.

Frequency

60 Hz.

Maximum System Voltage

15.5 kV, BIL 110 kV.

Thermal Rating

1,500 VA 30 °C. amb. 1,000 VA 55 °C. amb.

Approximate weight 85 lbs. unfused.

TWO FUSE Two Bushing

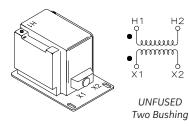

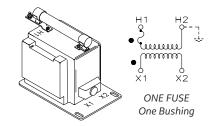

REGULATORY AGENCY APPROVALS

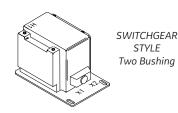

Manufactured to meet the requirements of ANSI/IEEE C57.13.

Recommended Minimum Spacings

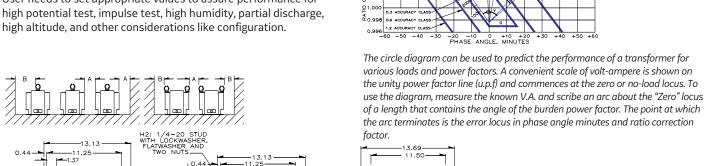

A = Unit to Unit or to ground = 1.25" minimum.

B = HV to Ground in air = 6.50" minimum.

Recommended spacing are for guidance only.

User needs to set appropriate values to assure performance for high potential test, impulse test, high humidity, partial discharge,

(a) Two fuse transformers should not be used for Y connections. It is preferred practice to connect one lead from each voltage transformer directly to the neutral terminal, using a fuse in the line side of the primary only. By using this connection a transformer can never be made "live" from the line side by reason of a blown fuse in the neutral side. For continuous operation the transformer primary voltage should not exceed 110% of rated value.

(b) Voltage transformers connected line-to-ground cannot be considered to be grounding transformers and must not be operated with the secondaries in closed delta because excessive currents may flow in the delta.

(c) See page 32, item 1 for ferroresonance considerations. Values in table are in ohms.

Note: It is recommended that system line-to-line voltage not exceed the transformer maximum system voltage level.

- Primary terminals that are unfused are 1/4-20 brass screws with one flatwasher and lockwasher.
- Primary terminals that are fused are 1/4-20 brass screws with one flatwasher and lockwasher and two nuts.

0.2 p.f.

0.1 p.f.

- Secondary terminals are No. 10-32 brass screws with one flatwasher and lockwasher.
- The core and coil assembly is vacuum encapsulated in polyurethane resin.
- Thermal burden rating is for 120 volt secondaries.
- Switch gear style is similar to fused style. No fuse or fuse clip is provide, but inserts for fuse clips are supplied.
- A test card is provided with each unit
