Active redundancy module

1 Description

QUINT ORING is the DIN-rail mountable active redundancy module from the QUINT POWER product range.

With the help of the redundancy module, two power supply units of the same type switched for redundancy on the output side are decoupled 100% from each other.

Redundant systems are used in plants that make particularly high demands on operational safety. The power supply units involved must be dimensioned to enable the total current requirements of all loads to be covered by one single power supply unit.

If the total requirement increases, e. g., due to additionally installed loads, and exceeds the nominal current of the power supply units, the power supply unit system is no longer redundant. A defect in the power supply unit or the wiring can also lead to loss of redundancy.

This can be detected immediately via a floating signal contact and a corresponding LED.

The Auto Current Balance (ACB) technology allows even current distribution of the load current to the connected power supply units, which decisively increases the service life of the redundant system.

Features

- low-loss decoupling of power supply units connected in parallel
- Preventive function monitoring
- Auto Current Balance technology

4 Technical data

Input data/output data	
Nominal input voltage	24 V DC
Input voltage range	18 V DC ... 28 V DC (SELV)
Voltage drop, input/output	0.2 V (I_{OUT} = 40 A)
Nominal current	2x 20 A (-25 °C ... 60 °C) 1x 40 A (-25 °C ... 60 °C)
Maximum current	2x 26 A (-25°C ... 40°C) 1x 52 A (-25°C ... 40°C) 120 A (12 ms, SFB Technology)
Transient surge protection	Varistor
Protection against polarity reversal	Yes, < 60 V
Protective circuit	Protection against static surge voltages > 30 V
Nominal output voltage	0.2 V (< DC input)
Output current	40 A (Increasing power) 20 A (Redundancy)
Derating	60 °C ... 70 °C (2.5%/K)
Power loss nominal load max.	8 W (I_{OUT} = 40 A)
Efficiency	> 98 %
Protection against surge voltage on the output	≤ 32 V DC

Redundancy OK, 13/14	
Output description	Group contact
Voltage	max. 30 V AC/DC
Current	≤ 100 mA (short-circuit resistant)
Status display	LED redundancy OK / Green

ACB (Auto Current Balancing) OK, 23/24	
Output description	Contact closed: Δ U_{IN} ≤ 300 mV
Voltage	max. 30 V AC/DC
Current	≤ 100 mA (short-circuit resistant)
Status display	ACB OK LED / LED bar graph green

General data	
Insulation voltage input, output / housing	500 V

5 Safety regulations and installation notes

EXPLOSION HAZARD

Only remove equipment when it is disconnected and not in the potentially explosive area!

DANGER

Never carry out work on live parts!
The housing can become very hot, depending on the ambient temperature and load!

CAUTION:

Before startup please ensure:

The connection must be carried out by a competent person and protection against electric shock guaranteed.

It must be possible to switch off power to device according to EN 60950.

All feed lines are sufficiently protected and dimensioned!

All output lines are dimensioned according to the maximum output current of the device or separately protected!

Sufficient convection must be guaranteed.

NOTE: Danger if used improperly

The redundancy module is a device installing into an enclosed space. Installation and start-up may only be carried out by qualified personnel. The relevant country-specific regulations must be observed.

8 Installation

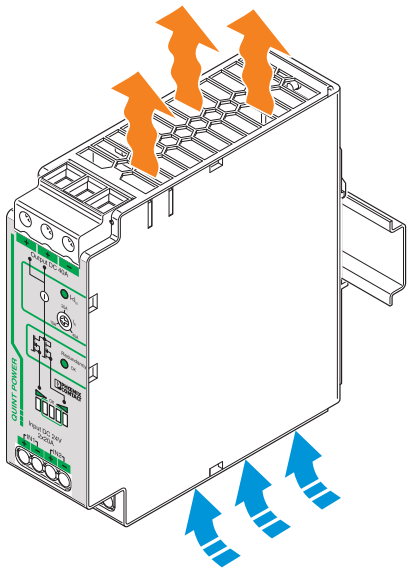

Figure 2 Convection

In order to ensure sufficient convection, we recommend a minimum vertical distance of 50 mm to the other modules.
A lateral distance of 5 mm, and in the case of active components, that of 15 mm is necessary for proper functioning of the module.
Depending on the ambient temperature and the load of the module, the housing can become very hot.

The module can be snapped onto all DIN rails according to EN 60715 and should be mounted in the normal mounting position (horizontal device orientation, connection terminal blocks on top and bottom).

9 Mounting position

Possible mounting positions:

Normal mounting position, installation depth 125 mm (+ DIN rail) (delivery state)

Rotated mounting position, 270° Y-axis, installation depth: 41 mm (+ DIN rail)
